

Lory®

Parallel and personal media delivery alongside the shared venue experience.

SPECIFICATION	CONFIGURATION REQUIREMENT
Role	Parallel and personal media delivery alongside the shared venue experience.
Foundation	A dedicated QuickSilver delivery system or a specified part of a wider QuickSilver installation.
Visitor access	Supported phones, receivers and browsers. QR-code or near-field communication entry is selected for the experience.
Media	Authored multilingual audio, captions and subtitles, sign-language video and the selected personal listening interface.
Network and timing	Plan wireless coverage and capacity, synchronization references, buffers and reconnection behavior. Establish timing with the actual phone or receiver and listening connection.
Development boundary	Electronic Braille integration is a roadmap direction. Device support and timing are configuration-specific; no universal synchronization figure is claimed.

Terms in this brief

QR. Quick Response code: a square code scanned to open a link or begin a supported registration process.

Define the installed configuration

Use the requirements above to agree the project scope, participating equipment and acceptance criteria with Mad.
